Hot! Hot! Hot! Posted by Chris1GCPI - 12 Jul 2011 23:36	
Good grief Charlie Brown! Is it hot enough for everybody!? We've had triple digit temperatures for the past few days with heat indexes from 105-113 degrees! I feel like I'm about to melt into a blob.	
Anyone else out there trapped by this heatwave?	

If you are, please taken the necessary precautions against heat stroke and other heat related problems.
