Well, so far I've been able to secure one location for a pair of Halloween night static infrared cameras. They will be placed in the "Antique Emporium of Brevard". This is a Antique shop with reported paranormal activity. The IR Cams will be left on all night in a live broadcast session. You can chat and watch for activity all night.

We're still looking for more live investigations for the night. Our goal is to have 8-10 separate live investigation feeds going from all across the country.
