Posted by crystalcross - 11 Apr 2011 22:14 Craig, Very interesting photograph. I've taken the original and boosted the luma gain. Very very interesting. Really, the only thing I can rebut, is that the grainy nature and pastel like colors tend to make it look like a painted image rather than a photographed one. Hard to tell, but very interesting. It seems to be one of the more realistic depictions of the spectral orb.
